# SHUTTERING MAGNETS

For higher efficiency and quality in precast concrete production.

GME shuttering magnets offer an Ideal range of applkations perfectly sutable for allkinds of formworkconstruction, both for wood, steel or glass fibre fom-work skins. All GME preclslon magnets have extraordinarily high adhesive power in comparnson to their welght. The proven GME System to actlvate and deactivate the magnet allovis unlimited options at the push of a button. With the accordingly developed adapter technology GME magnets present unlimited options for use, which can be adapted to your Indiidual requirments at all times and ensure maxlimum flexiblty for future asstgments.

## SHUTTERING MAGNETS PRODUCTION PROCESS

1

Iron plate cutting, punching (reserved screw holes and button holes)

2

Hydroforming the cut iron plate

3

Welding of internal structure of iron shell (bolts, nuts)

4

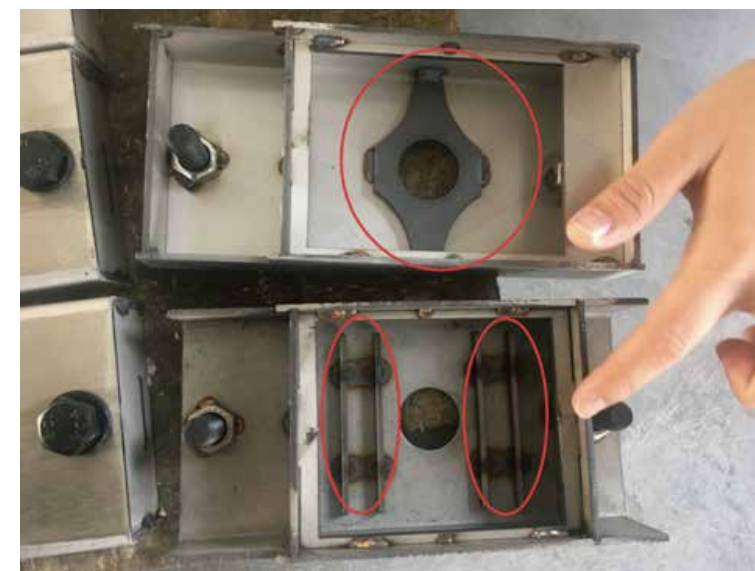

Core assembly arrangement

5

Assemble the core, iron shell, and head button by bolts

Shell welding structure is different

- 1) Our bolt welding is reserved inside the magnetic box
- 2) The support points under the button are inconsistent. We use a 3mm diamond-shaped iron plate and solder it to both ends. In this way, when the button is under the force, the support area of our product is much larger than that of the four small iron bars.

## GME SHUTTERING MAGNETS PRODUCT ADVANTAGE

The bolts used have the highest tensile strength rating (12.9)

The outer casing is stronger

**OUR PRODUCTS**

Two-layer coated metal

**PRODUCTS ON THE MARKET**

Only one layer of coated metal

**OUR PRODUCTS**

Our magnet is locked from bottom to top

**PRODUCTS ON THE MARKET**

the market is locked from top to bottom

**OUR PRODUCTS**

Galvanized

**PRODUCTS ON THE MARKET**

No galvanizing

**OUR PRODUCTS**

Coating corrosion protection, rust prevention

**PRODUCTS ON THE MARKET**

fine, and not Anti-rust treatment

**Great Magtech (Xiamen) Electric Co., Ltd.**

## **GME Precast Concrete Magnet Warranty Commitment**

We have made the following quality assurance commitments for our company product: Shuttering Magnet.

● **Products belong to the original authentic products of the manufacturer:**

We are committed to providing the following quality assurance and bear the corresponding legal responsibilities:

1. The products provided are brand new, meet the national quality standards.
2. Guarantee the satisfaction of all contents of the Quote Product Service Commitment;
3. Ensure that the products provided meet the requirements and national or industry standards.

● **Warranty period, scope, warranty conditions:**

1. Our company provides ONE year quality warranty for the stable magnetic force, only under proper application and maintenance.
2. During the warranty period, if the quality problem is found when operating in strict accordance with the manual, seller company is responsible for the replacement with qualified products. The product cost of replacement is the responsibility of seller company, users need to send back unqualified product to seller company address.

Note: The seller is responsible for the product exchange. Correspondingly, the buyer should bear the shipping cost of returning and redelivering.

● **After-Sales Service Contact**
